

ISE FLEET SERVICES

eFleetSuite, ISE's commercial-grade compliance application, has been specifically designed from the ground up for adoption by telematics service providers and fleets alike.

This end-to-end solution manages driver's hours-of-service and vehicle maintenance compliance, which results in operating a safer, more profitable operation.

eFleetSuite

Affordable. Easy. FMCSA Compliant.

Electronic Logging Solution

License

Partner and license a solution to offer on your hardware

Purchase

Purchase a telematics solution for your fleet

Applications Available:

ELECTRONIC DRIVER LOGS

Electronic Driver Logs automates record keeping of all information required to comply with Hours of Service reporting. Dispatchers have visibility to real-time driver availability.

DRIVER VEHICLE INSPECTION REPORTING

DVIR assists drivers with electronically documenting pre and post trip inspections. Reports are filed automatically and back-office personnel are notified of issues requiring repair.

COMPLIANCE MAPPING

Designed for single and multi-vehicle operations, the Mapping application shows the location, duty status and availability of all users and vehicles to improve fleet visibility and operations.

FUEL TAX DATA COLLECTION

The Fuel Tax Data Collection application captures GPS and odometer readings which can be sent to and processed by third party fuel tax providers.

Asset Type	Asset ID	Odometer
Vehicle	318575	12345.6
Vehicle	318576	12456.7
Vehicle	318576	12456.7
Vehicle	318576	12456.7
Vehicle	318578	12456.7

eFleetSuite Overview Each application is a complete end-to-end solution consisting of an easy to use in-vehicle interface, cloud hosted web portal, and communications channel which exchanges information between the vehicle and web portal.

User friendly driver interfaces

Remaining driver availability calculations

DRIVER BENEFITS:

- Hours of Service records are automatically captured eliminating manual entries
- Automated calculations keep drivers informed of driving availability, improving time management and warning of impending violations
- Integrated DVIR workflow ensures inspections are always performed at the appropriate time
- HOS and DVIR documentation always available for roadside inspection

FLEET BENEFITS:

- Easily view, update and print Driver Logs and DVIR reports
- Real-time information assists in resource allocation and equipment defect resolution
- CSA Fatigued Driver and Vehicle Maintenance BASIC scores are better maintained and improved
- Automated back-office record retention reduces clerical time
- Exceptionally easy to implement

ABOUT ISE & ISE FLEET SERVICES:

Innovative Software Engineering (ISE) is a leading engineering and systems integration firm that delivers innovative, end-to-end mobile and enterprise solutions. ISE's business is segmented into three divisions, each focused on satisfying different customer needs.

PROFESSIONAL SERVICES

Professional Services offers clients a complete spectrum of software engineering services including solutions in the areas of Big Data, Mobile App Development, Vehicle Telematics and Engineering Process.

INNOVATION SERVICES

Innovation Services provides the capability to achieve and sustain short and long-term growth throughout the entire organization. It is this approach that allows us to remain focused on enhancing our customer's experience as they look for technology solutions. Within this business unit, we provide services to our internal business units and external partners.

FLEET SERVICES

ISE Fleet Services leverages eFleetSuite, ISE's commercial-grade telematics platform, to provide an end-to-end safety-focused solution geared toward satisfying the needs of commercial fleet customers and partners throughout North America.
