To Whom It May Concern:

ISE Fleet Services' A317 computer, when used with ISE eFleetSuite software, complies with United States Department of Transportation (USDOT) Federal Motor Carrier Safety Administration (FMCSA) specifications for automatic on-board recording devices as found in [49 CFR Part 395](#). The A317 and eFleetSuite have been laboratory and road tested in a variety of commercial motor vehicles to meet the requirements of 395 section 15.

The A317 is tamper resistant and allows easy auditing of records during a roadside inspection or driver self-review. On demand, the color touch screen display can produce summary and detailed information needed to assess compliance with hours of service regulations.

When installed as directed in the ISE Fleet Services Installation Guide and used as described in the eFleetSuite Driver Guide, our systems are certified by ISE Fleet Services to meet USDOT/FMCSA requirements.

Sincerely,

*Hass Machlab*
